FireFX

A new world of warmth

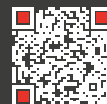

Cylindrical, tall and captivating, the FireFX Atlas woodburning stove range blends Scandinavian elegance with British practicality. Each model - Atlas 1, 2 and 3 - is crafted from robust steel and cast iron, combining striking presence with enduring performance.

A curved glass window offers a stunning, uninterrupted view of the flames, while the Atlas 2 and Atlas 3 expand the experience with side panels for a panoramic 180° display. The Atlas 3 goes further still, with sleek extended black glass creating a seamless, architectural finish.

Delivering up to 82% efficiency, the Atlas range produces powerful convected heat for balanced warmth throughout the room. Every model is Ecodesign compliant and DEFRA-exempt, ensuring cleaner, efficient burning even in smoke control zones. Thoughtful touches such as concealed log storage behind the lower door and optional external air supply complete the design, bringing modern refinement to fireside comfort.

Five Year Extended Warranty

When you purchase a FireFX stove from our Expert Retailer Network your retailer will provide you with a Two Year Warranty for your new solid fuel stove. This can then be extended to a Five Year Warranty provided your stove is registered with FireFX. Full warranty terms and conditions are available to view at [firefxfires.com](https://www.firefxfires.com)

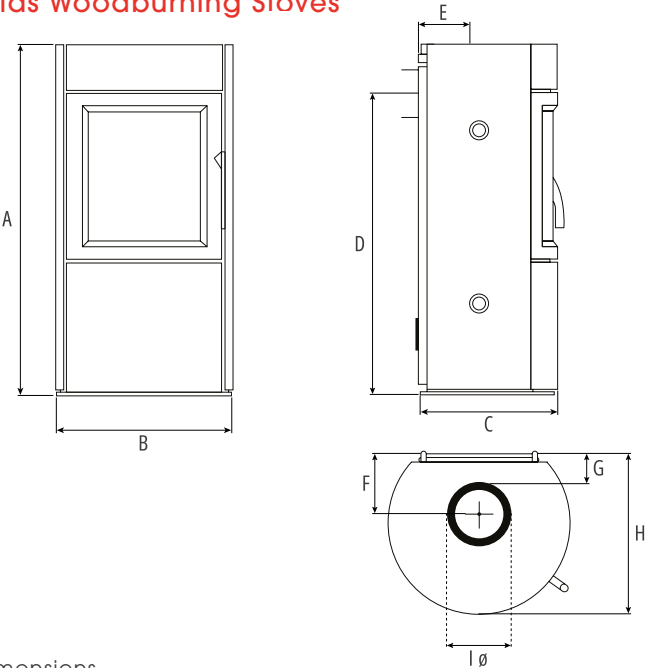

Advanced Ecodesign Performance

All FireFX Atlas stoves comply with the latest Ecodesign standards for low emissions and high efficiency - setting the benchmark for cleaner, responsible home heating. Burning sustainably sourced wood offers a low-carbon way to warm your home, and seasoned or kiln-dried logs ensure optimum performance and a cleaner, efficient burn.

Important Safety & Technical Information

A site survey by a qualified solid fuel installer is recommended before purchase, and all FireFX solid fuel stoves must be installed by an approved professional. Fires and stoves require adequate air supply; consult a competent person of solid fuel installations to advise if a fixed air vent is needed to meet Building Regulations. A Carbon Monoxide monitor is legally required. During use, all stove surfaces, particularly the glass panel in the door, become extremely hot and can cause serious injury if touched. Use a fireguard conforming to the latest version of BS 8423 when children, the elderly, or infirm are present.

Photography Information

FireFX pursue a policy of continuous product improvement, therefore, whilst our products are correct at the time of photography, we reserve the right to make alterations and amendments. Exact product details should be discussed with your retailer at the time of purchase.
